

Corporate Profile

COSMOBREESA GENERAL TRADING LLC

United Arab Emirates

About Us

We are CosmoBreesa, distributors of construction chemicals and building materials supplies in the Middle East. Established in 2021 in the UAE, our company has established itself as a trusted provider of materials and equipment solutions for construction projects due to steadfast focus on quality and customer satisfaction.

With dedicated team members, we are passionate about sourcing, developing, and distributing high-quality products to nearly all Middle Eastern countries.

We take pride in our partnerships with prominent brands, world-class manufacturers and related suppliers, ensuring that we offer top-notch products to our customers. Our commitment to excellence is evident in our sophisticated product range, professional approach, and personalized services.

Our Products include:

- **BUILDING CONSTRUCTION CHEMICALS**

Bostik Idenden HVAC Adhesives, Sealants, Coatings & Tapes

- **VALVES & FITTINGS**

Goetze German Valves For Building, Industrial and Marine Sectors

- **PIPES, FITTINGS AND FLANGES**

Brands from Europe, Japan, Korea, India and China

- **ELECTRICAL COMPONENTS**

Cables, Panels and Transformers

- **FLUID CONVEYANCE PRODUCTS**

Hydraulic Hoses, Industrial Large Bore & Composite Hoses, Thermoplastic, PTFE & Stainless Steel Hoses, Pneumatic Fittings, Couplings and Tubings

- **ECOLOGY UNITS**

- **SAFETY EQUIPMENTS AND UNIFORMS**

Our Services include:

- **SITE VISIT AND CONSULTATION**
- **SUPPLY AND INSTALLATION**
- **PROJECT MANAGEMENT**
- **CONTRACT MANAGEMENT**

Building Construction Chemicals

We are distributors for building construction chemicals like Bostik Idenden adhesives for the HVAC industry. Bostik has been relied upon as a world leader in the supply of tapes, coatings, adhesives and sealants to the HVAC industry since the 1960s. We can supply Idenden self adhesive reinforced foil tapes, self adhesive bright foil tapes, general purpose adhesives, water based insulation adhesives, sprayable vapour barrier coatings, vapo seal coatings and high velocity acrylic duct sealants. If energy efficiency targets are to be met, we have solutions available that can help HVAC professionals meet these challenges along with DCL certification.

Valves and Fittings

We are exclusive distributors for Goetze Lead-free RG+ GUNMETAL pressure reducing valves with a 3 year warranty including spares with applications in potable water and building technology, fire trucks, waste water management, irrigation systems and desalination plants. These come with various test approvals like European PED, National Test Type (TUV), EU type examination to name a few. We also supply Goetze safety valves, pressure releasing valves and pressure reducing valves.

Pipes Fittings and Flanges

We can source pipes, fittings and flanges of reputed brands from Europe, Japan, Korea, India and China for our customers adhering to optimal safety and work standards. These products are ISO certified with LEED gold ratings.

Fluid Conveyence Products

Hydraulic Hoses

We provide hose assemblies that withstand high pressure as well as extreme temperature applications whose features include but are not limited to endurance to abrasion, resistance to atmospheric conditions, flexibility and compactness.

Industrial ,Large Bore and Composite Hoses

We are equipped to assemble and test hoses of different sizes varying from 1/4" to 12". We also provide custom hoses for specific applications on a MTO basis

Thermoplastic, PTFE and Stainless Steel Hoses

These are used for very high pressure ,high temperature and corrosive applications that are beyond the capabilities of rubber and plastic hoses.

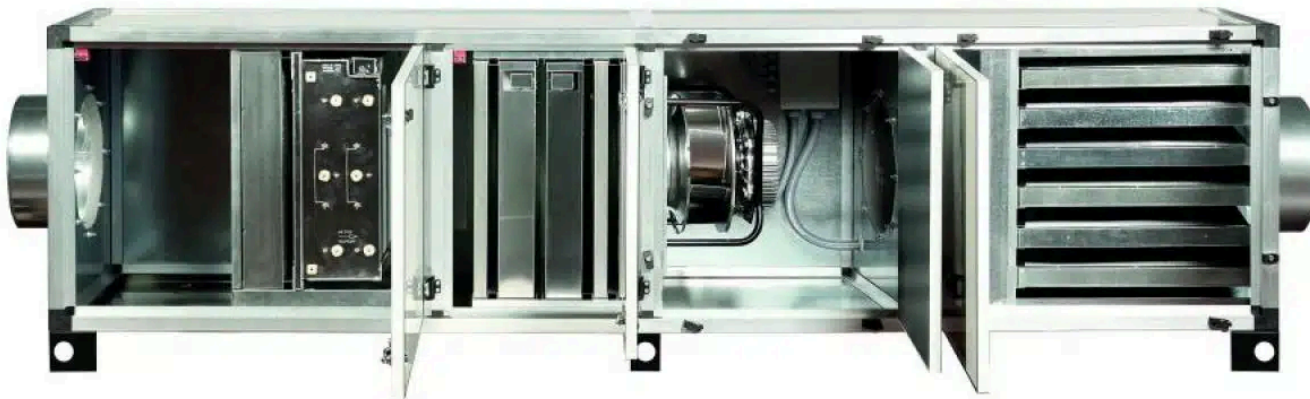

Fittings, Adaptors and Related products

We offer fittings, adaptors and other products that are specifically designed to suit our hoses. This prevents the risk of leakage, malfunctioning of hoses and consequent damage.

Ecology Units

Minute airborne aerosols are created out of vapours during frying, grilling and roasting. These penetrate human lungs and cause health damage. Heating and cooking fats and oils alters them to give rise to glycerol, free fatty acids, aldehydes, ketones etc which are hazardous to health. Hence it makes sense to clean and neutralize the exhaust air before releasing into the environment using a multi stage filtering ecology unit. Our Kitchen extract units are compact plug and play solutions with easy installation and maintenance. they are equipped with low energy plug fans with AC and EC motors with low sound levels. All internal parts are corrosion protected.

Uniforms and Safety Equipments

We can supply high quality professional workwear for cleanroom environments, controlled environments and hygienic, low contamination risk environments. Our garments have ergonomic fittings and are ideally suited for industrial laundering. The choice of garments and fabric can be varied according to ISO classification. All our materials are strongly controlled on quality and sizing before production. We follow strong rules in our code of conduct for ethical production and our range can fit GMP and ISO standards.

Our high quality safety footwear is manufactured to meet stringent testing requirements. We can meet special market requests and customize as per the specification of the customer at a competitive price. Our premium quality leather safety footwear are oil resistant with a anti-slip, chemical resistant outsole and protective steel toe cap. We can offer Antistatic feature, Electro static discharge feature or penetration resistant midsole insert optionally on demand.
